

## Introduction:

- SN-38 is an active metabolite of Irinotecan, a topoisomerase 1 inhibitor.
- Irinotecan, in turn, was developed as a more water soluble analogue of the natural product camptothecin.
- Irinotecan is included in the WHO list of essential medicines for the treatment of colorectal cancer.
- As of April 2020, SN-38 was approved as an antibody-drug conjugate (Trodelvy) for the treatment of triple-negative breast cancer.
