

BD-9136

Highly potent and selective BRD4 degrader

BET inhibitor + degrader (PROTAC)

Bromo- and Extra-Terminal domain (BET) family

1. Histone readers and transcriptional coregulators
2. Therapeutic targets for human cancers and other human diseases.
3. Highly homologous proteins

only DC<sub>50</sub> values measured in MV4;11 leukemia cell line are shown, more evaluations are in the publication
